- Vascular studies (MRA)

Nuclear Medicine

- Routine imaging plus sentinel node and physiological imaging

Ultrasound

- OB/GYN
- Breast Studies
- Vascular

Video Fluoroscopy

- Swallowing Studies
- Digital

Patient Convenience

All facilities are linked by a digital image archiving system, known as PACS, which enables us to store, quickly retrieve and distribute images to physicians. Reporting is produced via voice dictation, with most exams communicated to physicians within hours of completion. The benefit to our patients is faster turnaround of their test results.
